High-rise solutions – Style
An incredible way to design your elevator.
Your lobby. Your style.

With over 140 years of lobby design experience, Schindler has accompanied customers over their building design journeys many times over.

Elevators are striking architectural elements. They determine the impression the building makes – at first glance, right when you enter the lobby. With their wide spectrum of materials, colors, and design elements, Schindler high-rise elevators blend independently but still harmoniously into the overall building concept.
Stylish designs.
Creating a memorable experience.

A building's character is not defined only by its architectural exterior or lobby design.

A building tenants' experience is defined through his or her daily trip in the elevator car as well.

With Schindler you turn your high-rise elevators into an architectural gem – that completely fulfills your visions and desires.

Be inspired by the examples in this brochure – but don’t let them limit you.
The customization approach.

When state-of-the-art creation meets functionality.

Schindler offers unlimited freedom for the design of the elevator cars. The feeling of safety and protection contributes to a comfortable trip.

An elegant ambiance puts passengers at ease and leaves long-lasting impressions of enjoyable moments.
Absolute design freedom.
For your eyes only.

Because your most exclusive projects deserve the best, we dedicate our world-renowned designers and our two International Design Centers to provide you a full customization service. Get the best design experts into your team.

We bring your landmark of design excellence onto the global architectural style.

The individual design of an elevator car can be defined by the following elements by choosing different materials, forms and colors for:
- Ceiling and lighting
- Wall cladding
- Operating panels
- Floor
- Accessories (mirrors, handrails etc.)

In compliance with the local elevator standards, all these elements can be combined to achieve the car ambiance that reflects your design ideas and complements the building.
Schindler offers unlimited freedom for the design of the elevator cars. From the first drawings to the final customized car.

To guarantee perfect design and quality, the manufacturing process of individualized cars is divided into 8 time-proven steps:

1. Technical clarification and offers
2. Approval of 2D or 3D plans
3. Visualization of the interior
4. Sampling process
5. Professional project management
6. Presentation and approval of car mock-up
7. Manufacturing and delivery
8. On-site and follow-up support
Landing door and door frame.
Diversity becomes harmony.

Landing doors and door frames greatly influence the surrounding architecture. Irrespective of whether you blend them into the walls as inconspicuously as possible or deliberately use them to set an independent accent. Either way – your elevator design is sure to make an impression.

**Landing door construction**

Schindler elevator doors are normally center-opening, but we offer all options, such as telescopic doors. A variety of ways of fastening the doors allow them to be safely integrated into different types of wall.

**Landing door frames**

Standard door frames are available in a diversity of basic models. 'Basic frames' are discreetly recessed. 'Box frames' deliberately emphasize the frame as a single architectural element. 'Angle frames' can be placed invisibly behind the wall cladding. In extremely high rooms, all frames can be combined with a 'flush transom'. This allows the door heights to be optically lengthened up to 4 meters.
The standard approach.
The three decoration lines.

Create the look and feel you like. Combine colors, materials, lighting, mirrors, handrails and fixtures to achieve the ambiance that fits both your ideas and your building. Choose from one of our three interior design lines.

Times Square  Park Avenue  Sunset Boulevard
Ready-to-install.
Choose your look.

Inspired by the global architectural trends, our ready-to-install decor collections are designed to match any project, and ease the process of selection, costing, production, delivery and installation. With our simulation tool, you will be able to easily find the style that fits your building.

Our award-winning solutions design your high-rise achievements of today, tomorrow and the skylines to come.
Times Square.
Choose your colors and materials.

Determine your contemporary look. Choose from warm or cool colors to create a fresh look or combine the options to enhance contrast for more depth.

Times Square adds distinctive features to any public, commercial or residential building.

Multicolor options
Play with fresh and vibrant colors. Choose from a range of warm and cold colors that look great on their own, but also stunning when combined.

Laminate and stainless steel
Create a different ambiance by selecting different materials. For a fresh look and feel, choose from colorful laminates. Stainless steel gives a more clean and modern look. Combine both materials for more individuality.

Laminate

Stainless steel

Note
Specifications, options and colors are subject to change. All cars and options illustrated in this brochure are representative only. The samples shown may vary from the original in color and material.
Discover pure elegance with back painted glass walls or choose wood laminate to create a more contemporary ambience. Highlight is a silver-shimmer from our metallic glass collection or a gold or satined grey finish on stainless steel.

Matched lighting perfects the stylish design of this elevator – an ideal fit for representative buildings like high-end residential, hotels and offices.

**Back painted glass**
By putting color behind glass, you create a high gloss and vibrant effect that adds a pleasant ambiance to your car.

In order to make the back painted glass walls perfectly fit the overall appearance of the building, you can either choose from pre-selected colors or optionally specify any NCS (Natural Color System) color.

**Stainless steel**
Specifications, options and colors are subject to change. All cars and options illustrated in this brochure are representative only. The samples shown may vary from the original in color and material.
Sunset Boulevard. Inspirational and full of character.

Aim high for passenger excitement in upmarket locations like hotels, clubs and restaurants.

The combination of premium quality materials, captivating patterns and splashy color gradients make this car a unique experience. Lighting and ceiling concepts create a fascinating atmosphere. Make your elevator become your stage.

**Digital print on satinated glass**
Gorgeous and intense colors, emphasized through satin glass for more elegance. From atmospheric blue-red to warm gray-beige color gradients, this design allows you to create a fascinating ambiance and an unforgettable ride experience.

**Digital print on stainless steel**
Create ambiance not only with colors but with eye catching patterns printed on stainless steel. Choose clear structured geometrical forms or bold organic designs. No matter the size of your car, digital decoration patterns always look stunning.

Service lift. Fundamentally yet reliably designed.

An eye for mass and love for detail is not a contradiction in terms. When it comes to our goods elevators, those terms are our guide.

Service elevators are required to vertically transport personnel and material. They can be used in most types of high-rise buildings.

An absolutely presentable elevator. Thanks to its robust technology, high-quality materials, and practical equipment features. A consummate achievement.

Setting your own limits.
More for less.

More for less. Setting your own limits.
Whether technically cool, cozily warm, timelessly elegant, or playfully individual – the walls, car doors, fittings, ceilings, floors, and lighting give your elevator cars a uniquely strong character.

Taking pleasure in your creativity, you alone determine the individual appearance and formal aesthetics.
Matching accessories.
A perfect outfit.

Mirrors
Mirrors always add a special sense of space to rooms and buildings. In order to give your car more appeal and depth, the side walls or the rear wall can be provided with a full-height or half-height safety-glass mirror.

Handrails
Even though your elevator travels smoothly with almost no sound, handrails convey a feeling of security. Shiny or brushed stainless steel handrails match the interior and shape of your car and can be mounted to the side and rear walls.

PORT Technology
This new range of PORT destination Control terminals delivers brainpower to your building. Various PORT terminal options are available to optimize traffic stream.

PORT 1
PORT’s unique curved glass design, more powerful than ever. Available in three colors variations, wall-mounted or free-standing, PORT 1 offers optimal ergonomics in an unobtrusive and compact form.

PORT 1 pedestal
PORT 1 wide
All the power of the latest PORT 1, just bigger. The impressive curved glass houses a large 10.4” display to take full advantage of the all-new portOS functionality.

PORT 4 and PORT 4 Surface
Subtle elegance without compromise. With its clear lines the flush-mounted PORT 4 integrates smoothly into all kinds of architecture.

PORT 1 wide pedestal
PORT Destination Indicator
The new PDI is a fully graphical LCD indicator in the car door jamb which is able to indicate not only the destination floors but also the next stop and optionally also announces the door’s status and floor names with an integrated loudspeaker.

The colors are aligned with the PORT terminal colors. The PDI comes either in flush or applied version.

PortOS
Introducing portOS. A totally new way to communicate with your elevator system.
Versatile, smart, seamless.

List view
- Scrollable list view
- Suited best for office buildings
- Offers a lot of space for floor information

Panel view
- Panel view with page swipe
- Display up to 20 floors per page on PORT 1
- For high-rise buildings

Tiles view
- Big tiles to maximize readability
- Ideally suited for apartment buildings with less than 10 floors

Category view
- Two-click interface with grouped floors
- The perfect layout for mixed-use buildings, i.e. hotels
